PROJECTS

Airline Management system

(01/2024 - 03/2024)

- Airline management project is a database project implemented in oracle, primary deals with the management of the airlines, passengers and employees working for an airline.
- The system provides a broad view of underlying operational factors that influence the airline management. It includes the details of passengers, reservation details, and if the user needs to cancel the reservation.

Thrombocytopenia Detection using AI & Deep Learning.

Team Project | Python, YOLOv3, KNN.

(02/2025 - 05/2025)

Developed a deep learning model to detect low platelet count from blood smear images. Used YOLOv3 for real-time platelet detection and KNN for disease classification. Aimed to support early diagnosis in rural healthcare settings.

SKILLS

SQL, Html, Css, Java, JavaScript, Dsa, Python, C, C++

Relevant courses

Cloud Computing

Full stack web development

Object oriented programming language

Artificial intelligence and machine learning

Achievements

Represented School in Science and Exhibition competition (01/2019)

Lead the Team of Co curricular Activities in School and Awarded as best Mentor (03/2018)

Certificates

AI-DevOps Engineer Internship

(09/2024 - 03/2025)

Rooman Technologies (in collaboration with IBM & Wadhvani Foundation)

Smart system design using python

Programming

(10/2022 – 11/2022)
